FROM CONCEPT TO FINISHED PRODUCT TRUST GKI CUTTING TOOL

CUSTOM BUILT TOOLING

Design, Engineering, and Manufacturing of Special Blueprint Tooling

As Your Cutting Tool Specialist™ GKI TOOL offers complete design, engineering, and manufacturing of special blueprint tooling.

Backed by over 35 years experience, any indexable tool can be built to your specifications, or built from scratch - from concept to finished product. Even if all you have is a piece-part print, we can design and build the tool to do the job.

Any style custom tool is available, including:

- Milling Cutters
- Modular Tools (KM/CAPTO/HSK/ABS)
- Tool Holders
- Cartridges
- Boring Bars
- Indexable Drills
- Trepanning Tools

Delivery times vary; however, for an additional charge, rush jobs can be completed in as little as two weeks!
